FIND YOUR CORRECT BELT SIZE

The BEST way to determine your belt size is to measure your current belt from the tip of the **buckle** (including the buckle) to the **hole most worn**. The needlepoint needs to be a minimum of 4" shorter than this measurement. EXAMPLE: 38" Belt >> 38" – 4" = 34" of needlepoint needed. In addition, each end will have another 1 1/2" of needlepoint covered by the leather points. Please keep your design INSIDE these guidelines.

I have read the above and understand how to measure my BELT SIZE.

I need my finished belt size to be inches.

*Please note that we make every effort to preserve the canvas design, however, if you have extra stitching this may be covered up by the leather. ****If you do NOT wish to have your work cropped, please specify and we will adjust your belt length accordingly*****
