FIND YOUR CORRECT BELT SIZE

The **BEST** way to determine your belt size is to measure your current belt from the tip of the buckle (including the buckle) to the **hole most worn. THIS IS YOUR BELT SIZE.** The amount of needlepoint you need to stitch is 4" shorter than this measurement. EXAMPLE: My belt size is 40" = I will need 36" of stitched needlepoint. In addition, each end will have another 1 1/2" of needlepoint covered by the leather points. Please keep your design or initials away from the ends of the stitched area

I have read the above guideline and understand how to measure my BELT SIZE.
I need my finished belt size to be [] inches to the middle hole .
We make every effort to preserve your canvas design. If you have extra stitching this may be cropped or covered up by the leather. ****If you do NOT wish to have your work cropped check here and we will adjust your length accordingly**** []
